MAGNAPLUS

Generator Ratings: kW 5 to 430 (60 Hertz) kVA 5 to 420 (50 Hertz)

A REGAL-BELOIT COMPANY

ISO 9001:2000 Certified

MAGNAPLUS

What makes the Marathon Electric approach unique? Proven top performers in every respect, MAGNAPLUS® generators offer powerful performance, reliable power generation, and easy installation. With a full range of voltage regulator configurations, MAGNAPLUS® provides application flexibility to meet unique installation requirements. Ruggedly constructed with solid state technology, Marathon's SE350 voltage regulator, included with all standard equipment, is a solid performer.

MAGNAPLUS® offers a field-adaptable, permanent magnet generator, coupled with the PM300 or DVR®2000E voltage regulator, for installations requiring fault current support or for applications involving non-linear loads. These regulators enhance generator performance and offer additional features, meeting the needs of the most difficult applications.

These unique design features make MAGNAPLUS® the ideal general purpose generator for standby and prime power markets such as:

- Agricultural
- Marine
- Commercial

- Construction
- Telecommunications
- Rental Markets

Marathon Electric: The experts in your field

As an independent manufacturer with more than fifty years of experience as a leading supplier to the generator market, Marathon Electric is dedicated to designing and manufacturing the highest quality electrical products.

Marathon's commitment to long term customer support and an intensive product development program means you get more:

MARATHON ELECTR

- Design & Application Experience
- Advanced Testing Facilities
- Technical Support Staff
- Broad Product Line

① 361 to 433 PSL models are the alternate to CSL models and have equivalent performance and dimensions.

② PMG Option available as build-up only.

③ Specialty and two bearing orders utilize these windings in place of 280 frame CSL models.

Product E e d t u r e

Choice ... abounds with more than 34 stock models ranging from 5–430 kW (60 Hz) and 5–425 kVA (50 Hz). All three-phase generators are 12-lead reconnectable, providing voltage and phase flexibility. For applications requiring price-sensible, dedicated single-phase generators, Marathon Electric stocks 26 models. Standard and optional conduit box designs are available to meet all customer requirements and to ease installation of accessories.

Easy Mount SAE Adapters ... provided with every generator, are designed with easy drive disc access to simplify the mounting to all popular engines. Generator foot mounting location is unaffected by adapter changes. Special adaptations for automotive engines are available.

Class H Insulation System ... utilizes an unsaturated polyester varnish for optimal insulation life and superior moisture protection. An epoxy overcoat is added for increased environmental protection. Field windings are wet wound with epoxy and designed to withstand overspeeds of 125%. All windings are 100% copper with class H insulation.

Linkboards ... are standard to simplify voltage reconnection and support lead termination.

SE350 Voltage Regulator ... is encapsulated for reliable performance in all environments. The SE350 regulator provides 1% regulation, underspeed protection, stability adjustment to optimize transient performance, and EMI filtering to commercial standards. **Optimized Electrical Design** . . . with four-pole, brushless features, utilizes a 2/3 pitch winding to minimize harmonic distortion. The main rotor, utilizing Marathon Electric's unirotor construction, provides exceptional waveshape and voltage balance. The unirotor construction method incorporates full amortisseur windings facilitating parallel operation and non-linear loads.

Enhanced Ventilation . . . created by a high efficiency cast aluminum fan and optimized internal air flow patterns, maximizes heat transfer and minimizes hot spot differentials for extended winding life. Durable aluminum alloy fans avoid breakage problems associated with steel weldments or plastic fans.

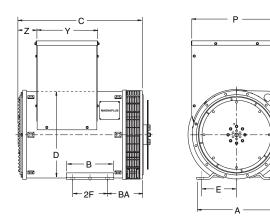

Fully Guarded . . . for operator safety and generator protection. No rotating or electrically energized parts are exposed. All openings are covered by louvers or screens.

Heavy Duty Bearings . . . are double shielded and pre-lubricated for the life of the bearing. This helps resist contamination and ensures a maximum bearing life.

Design Specs and Agency Approvals . . . are important at Marathon. All MAGNAPLUS[®] units meet NEMA MG1-32, BS5000, and IEC 34-1 requirements. **MAGNAPLUS[®]** generators are also CE Certified, CSA Certified and fully UL Listed. Marine versions are available to meet American Bureau of Shipping, Lloyds, Det Norske Veritas, or Nippon Kaiji Kyokai requirements.
